

SCHOOL PESTICIDE NOTIFICATION REGISTRY

TO: Parents, Guardians and School Staff

FROM: Scott County School District 2

RE: Pesticide Application Registry Notice

Scott County School District 2 practices integrated pest management, a program which combines preventive techniques, non-chemical pest control methods and the appropriate use of pesticides with a preference for products that are the least harmful to human health and the environment. Applications of pesticides are made only when deemed necessary to control a pest problem and after trying other means to control the problem. The term "pesticide" includes insecticides, herbicides, rodenticides and fungicides.

We are establishing a registry of persons who wish to be notified 48 hours prior to pesticides applications. To be included in this registry, please complete the attached form and return it to the Scott 2 Superintendent's Office.

Please include me in the notification registry. I understand that if there is an immediate threat to health or property that requires treatment before notification can be sent, I will receive notification as soon as it is practical.
